

The book cover features a dark blue background with a dramatic scene of a lightning bolt striking a dark, silhouetted landscape at night. The lightning bolt is bright white and jagged, extending from the top right towards the bottom center. The overall mood is intense and scientific.

# Contents

<b>1. Introduction</b>	<b>11</b>
1.1 Plasma Definition	11
1.2 History of plasma physics	12
1.3 Occurrence of plasma	13
1.4 Plasma and ordinary gas	14
1.5 Applications of plasma physics	15
<b>2. Characteristics of Plasma</b>	<b>17</b>
2.1 Plasma temperature	17
2.2 Debye Length	18
2.3 Quasi neutrality	19
2.4 Debye shielding	19
2.5 Characteristic lengths associated with plasmas	22
2.6 Plasma frequency	22
2.7 Conditions for a gas to be plasma	23
<b>3. Waves in Plasma</b>	<b>24</b>
3.1 Microscopic and macroscopic description of plasma	24
3.2 Plasma Waves	25
3.3 Equations governing the plasma dynamics	26
3.4 Dispersion relation	27
3.5 Representation of waves	28
3.6 Perturbation theory	29
3.7 Plasma oscillations	29
3.8 Plasma Electron oscillations	30
3.9 Electron plasma waves in a warm plasma	31
3.10 Ion Waves	34
3.11 Derivation of Ion-acoustic waves	34
<b>4. Nonlinear Waves</b>	<b>37</b>
4.1 Introduction	37
4.2 Solitons	38
4.3 Shock waves	40
4.4 Double Layer	41
4.5 Sheath	43
4.6 Equations of nonlinear plasma physics	44
4.6.1 Korteweg-de Vries equation (K-dV equation)	44
4.6.2 Derivation of Sagdeev Potential Equation	47
4.6.3 K-dV equation for nonlinear ion acoustic waves	49
4.6.4 The sheath equation	51

<b>5. Introduction to Dusty Plasma</b>	<b>52</b>
5.1 Introduction	52
5.2 Occurrence of dusty plasma	52
5.3 'Dust in plasma' and 'Dusty plasma' concepts	55
5.4 Characteristics of dusty plasmas	56
5.4.1 Neutrality condition	56
5.4.2 Debye shielding	56
5.5 Electrostatic sheath	58
5.5.1 Particles in the plasma sheath	58
5.6 Dust charging processes	59
5.7 Forces on a dust particle	61
5.8 Production of dusty plasma in laboratory	63
5.8.1 Modified Q – machine	63
5.8.2 DC discharge	64
5.8.3 RF discharge	64
5.9 Aspects of dusty plasma	65
5.9.1. Dusty plasma in space	65
5.9.2 Semi-conductor industry	66
5.9.3 Plasma chemistry	66
5.9.4 Fusion research	67
5.9.5 Crystal Physics	67
<b>6. Waves in Dusty Plasma</b>	<b>68</b>
6.1 Introduction	68
6.2 Linear waves in dusty plasma	68
6.3 Dust Acoustic (DA) waves (For mobile dust)	69
6.4 Dust Ion Acoustic (DIA) Waves (For static dust)	72
6.5 Experimental observation of DA waves	74
6.6 Experimental observation of DIA waves	75
<b>7. Nonlinear Waves in Dusty Plasma</b>	<b>77</b>
7.1 Introduction	77
7.2 Solitary Waves	78
7.2.1 Small amplitude DA solitary waves	78
7.2.2 Arbitrary amplitude Dust Acoustic Solitary Wave	81
7.2.3 Effect of dust charge fluctuations	89
7.2.4 DA Shock Waves	97
