ACTIVITIES

International Seminar on Emergence of Small Tea Growers', its impact on Tea Industry and the way forward

Organised by: Golaghat Commerce College and All Assam Small Tea Growers' Association

Date: 7th April, 2018

The programme was attended by delegates belonging to the Tea industry alongwith dignitaries from Bangladesh and Nepal.

The delegates present were:

- Sri. Mrinal Saikia, MLA, Khumtai LAC,
- Sri. Bidyanand Borkakoti, Vice Chairman, Tea Board of India,
- Sri. Bijay Gopal Chakraborty, Chairman, All India Small Tea Growers' Association,
- Dr. Kamal Buzarbaruah, Vice Chancellor Assam Agriculture University Jorhat,
- Director, Tocklai Tea Research Institute
- Director, Tea Development Board
- President, CISTA

An International Seminar on “Emergence of Small Tea Growers, Its Impact on Tea Industry and the Way Forward” was jointly organized by Golaghat Commerce College and All Assam Small Tea Growers Association on 7th April, 2018 on the occasion of the 10th Triennial Golaghat State Convention, All Assam Small Tea Growers' Association.

The program was organized by Golaghat Commerce College and Assam Small Tea Growers Association. Many renowned dignitaries namely Mr. Nepal Saikia Chairman NETA, Mr. Manoj Jallan ex- Chairman North Eastern Tea Association (NETA), Mr. Malpani executive member NETA, Mr. Manoj Jallan, Director Golaghat Tea Estate, Mr. Kamal Buzarbaruah, VC, Assam Agricultural University, Mr. Bijay Gopal Chakrabarty, Chairman, All India Small Tea Growers Association were present in the seminar. Though as a Higher Educational Institution we are not directly involved in the arena of production and manufacturing of tea and the problems associated with the tea industry, we are not quite novice in this field as well. The college is running a post-graduate diploma course in Tea Plantation and Management in collaboration with North Eastern Tea Association (NETA) and this experience has put us in an advantageous position in comparison to other Higher Educational Institutions in the district to organize an International Seminar on a topic of such practicability associated with the stakeholders of the tea industry in

Assam. Teaching staff of the Institution were encouraged to attend the seminar and 32 teachers from the college attended the seminar. Quite a good number of small tea growers from major tea producing countries like India, Sri-Lanka, Nepal and Bangladesh participated in the seminar, and some of them presented their papers as well

Issues like the colonial legacy of tea still haunting tea industry, the emergence of small tea growers in variegated geo-economic and socio-cultural conditions, and the problems faced by STGs in contradistinction to the ones encountered by the larger tea estates etc. were discussed in the seminar. In the course of the discussion it was pointed out that while the blenders and marketing channels appropriate ever-increasing profits, the small farmers have to bear the burden of fluctuating and falling commodity prices. In his profile, the small-holder tea grower is devoid of knowledge, starved of resources and lacking in organization particularly in respect of doing effective marketing. It emerged from the discussion that while farmers need some help in production, they need more help in manufacturing and most help in marketing.

The Centre for Tea Plantation Management has set up a Soil Testing Lab for testing 14 parameters of soil such as Nitrogen, Phosphorus, Iron, Copper, Manganese, pH level etc.

The Soil Testing facility at the College premises has been operating since January 2022, primarily to analyze the soil health of our Tea Plantations. Our Tea Soils have been deteriorating over the years in terms of decreasing nutrition, organic matter content, increasing compactness and acidity, decreasing essential minor and trace elements which are having detrimental effects in terms of yields, quality and increasing mortality of tea bushes.

Furthermore, Global Climate Change effects will deteriorate further in the years to come and will continue to affect tea plantations adversely and corrective measures in the Soil profile will play a major role in mitigating these adverse effects.

Parameters which can be tested in the Laboratory
