Assessment Procedure & Outcome

The programme provides our students a platform to understand mathematical reasoning and prepares them for various competitive examinations. Reasoning skills help students in improving their decision-making abilities, problem solving, and setting goals. In most of the companies and competitive exams, logical reasoning is highly essential. The aim of this course was to make the students understand the fundamental logical reasoning and help them to prepare for competitive examinations.

The students were evaluated through quizzes, group discussions, class test and so on. After completion of this course, a written MCQ test was conducted by the department. At the end of this course, on the base of MCQ evaluation, the course coordinator (HOD), Principal, Vice-Principal, IQAC Coordinator and other faculty members of the department of Maths and Stats distributed the certificates with appropriate grades. All the students successfully completed the course for this session.
